

THE TAPOUT CAGE BARRIER

The Tapout Cage Barrier brings the functionality of a full Professional or Training Cage into your gym at an economical price. The addition of a Cage Barrier not only gives your students and/or aspiring fighters the opportunity to train and learn the techniques necessary to fight up against the cage, but can serve as a partition between your grappling and striking areas providing you the assurance that your classes won't overflow into each other. It also serves as a great way to protect your mirrors and windows from the rigorous training of Mixed Martial Arts.

The Cage Barrier stands 5' 10" tall and comes in 10' sections. For a small additional fee, your Cage Barrier Sections can be built to imitate the angles of an octagon, hexagon or even 90-degree turns. Your cage barrier comes complete with the following:

1. Cage Barrier Framing
2. Vinyl-Coated Chain-link
3. Frame Padding and Vinyl Wraps
4. Vertical Post Pads
5. Assembly Hardware

1. Cage Barrier Framing

- The vertical posts that anchor the Tapout Cage Barrier to the floor are constructed of heavy gauge 3" x 3" steel with 8" x 8" base plates.
- The Cage Barrier panels are all constructed of 2" round tubing that locks into the vertical posts utilizing laser cut steel U-Brackets.
- The steel framing pieces are then sand blasted and powder coated with a Black Semi-Gloss color, providing superior scratch and corrosion resistance.

2. Vinyl-Coated Chain-link

- The chain-link is comprised of the thickest commercial grade wire available. The vinyl coating is then bonded onto the chain-link to ensure if cut, does not peel off.
- Custom color chain-link is available upon request. Please contact Tapout for additional pricing and color choices. *(please note, custom color choices may increase the production timeline of your Cage Barrier)*

3. Frame Padding and Vinyl Wraps

- The Cage Barrier framing is padded with a ¾" closed-cell polymer foam and then covered with a 10 oz. Black Vinyl that is secured with 2" wide Velcro straps
- The top horizontal bar is a great spot for branding and/or sponsorship advertising.
- Custom color Vinyl Wraps are available upon request. Please contact Tapout for additional pricing and color choices. *(please note, custom color choices may increase the production timeline of your Cage Barrier)*

4. Vertical Post Pads

- The vertical posts of the Cage Barrier are covered with a 14" wide, five-strap pad (Approved by the California, Nevada, Florida, Texas and New Jersey State Athletic Commissions) and serve to protect the athletes while training up against the Cage Barrier.
- The Vertical Posts Pads provide the most visible surface for branding and/or sponsorship advertising for your gym.

- Custom color Vertical Post Pads are available upon request. Please contact Tapout for additional pricing and color choices. *(please note, custom color choices may increase the production timeline of your Cage Barrier)*
- *100% deposit required on all Cage Barriers.*
- *Custom designed Cage Barriers are available upon request. Pricing and project timelines will be established during the quoting process.*
- *Allow thirty (30) days from date of deposit for production of your Cage Barrier.*
